

Annual price of solar modules

Overview

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Price Stabilization After Volatility: Solar module prices have stabilized in 2025 with global wholesale prices ranging from \$0. This work has grown to include cost models for solar-plus-storage systems. Factors like local economic conditions, installation methods, and energy policies all play a role in these price differences.
