

Barbados new container power generation

Overview

The island nation, vulnerable to the whims of the Atlantic, has officially signed a Memorandum of Understanding (MoU) with Danish firm Wavepiston to turn those crashing swells into a 50 MW power source. The news is an exciting step toward a cleaner future. A \$350 million hybrid renewable energy power plant is scheduled to be constructed in Barbados. It will be the largest, most advanced facility in the area, as BioEnergy Times reported. A joint initiative by the EU, Barbados, and leading French company HDF Energy, this green hydrogen storage project aims to integrate solar power with. Barbados is moving forward with its national energy policy and resiliency plan, with an RFP for up to 60 MW of battery energy storage systems (BESS) set to be issued by the end of the month, according to Energy Minister Lisa Cummins. Minister of Energy and Business Development, Senator Lisa Cummins, provided this.
