

# Brazil solar power generation and energy storage

## Overview

---

The total installed in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). Brazil expects to have 1.2 million solar power generation systems in the year 2024. Solar energy has great potential in Brazil, with the country having one of the highest.

## Brazil solar power generation and energy storage

---

### Solar power in Brazil

Solar energy has great potential in Brazil, with the country having one of the highest levels of insolation in the world at 4.25 to 6.5 sun hours/day. [4] As of 2019, Brazil generated nearly 45% of its energy, or ...

---

### Solar to add 13 GW in Brazil in 2025 amid signs of slowdown

Brazil is expected to add 13.2 GW of solar capacity in 2025, but the market is showing early signs of slowing as new large-scale projects face delays and distributed generation encounters

### Distributed Solar Generating Capacity Is The Fastest-Growing Power

The expansion of installed solar capacity, both utility-scale and distributed generation, appears likely to continue, although its future pace is less clear.

---

### Distributed solar generating

## capacity is the fastest-growing power

In Brazil, solar photovoltaic dominates the distributed generation sector, representing 99% of the country's total distributed generation capacity. Small hydroelectric and wind account for ...

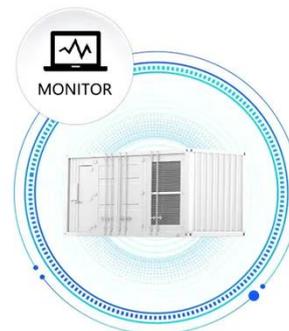

## Solar Energy Storage in Brasil: Technologies, Challenges

As of May 2025, Brasil has reached the milestone of 55 GW of installed solar capacity, with approximately 70% of this total originating from distributed generation. This model enables ...

## Solar Energy in Brazil: The Next Powerhouse , ISES

These records highlight the growing importance of solar energy in Brazil's energy landscape and its potential to soon become a major force in the country's energy transition.

## Spotlight on Brazil: A market ready for takeoff

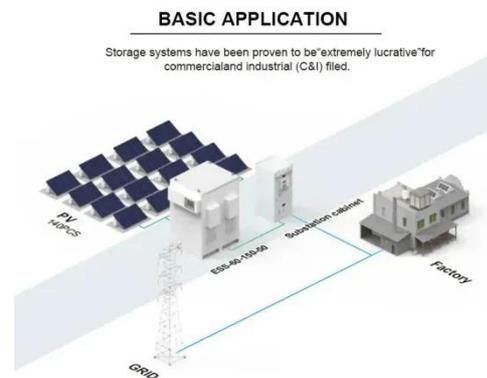

As the share of solar power in Brazil's electricity matrix grows on both transmission and distribution grids, so

does the need for flexibility and management of non-simultaneous generation ...

## Solar power in Brazil

The total installed solar power in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). Brazil expects to have 1.2 million solar power generation systems in the year 2024. Solar energy has great potential in Brazil, with the country having one of the highest ...

## Brazil's farmers bet on solar energy and batteries to stabilize power

Brazilian farmers have been expanding their solar energy capacity and testing batteries as a storage solution, in a bid to make electricity supplies more predictable and potentially reduce

## Solar Energy in Brazil: From Opportunity to a 55 GW Reality

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck expansion is reshaping Brazil's energy ...
