## Overview

---

While electric boats have been around for some time, advancements in solar cell technology, battery efficiency, and hull design have made solar-powered vessels a practical reality. Catamarans, with their dual-hull configuration, are naturally conducive to solar integration. Solar-powered catamarans are revolutionizing the yachting industry by combining luxury with environmental responsibility. These vessels utilize solar energy to power their systems, reducing reliance on traditional fuels and minimizing emissions. Catamarans consume power across a wide range, from low-wattage navigation electronics and lighting to high-demand systems such as refrigeration, watermakers, air conditioning, and. These vessels are powered by electrical energy, offering a more ecological, energy efficient, and environmentally friendly alternative to traditional cruising. From minimal operating costs to zero direct emissions, these eco-friendly vessels offer an unprecedented blend of performance and sustainability. Designed from scratch for ZEN Yachts by award-winning naval architect Julien Mélot, this full carbon.
