

Can photovoltaic brackets be used as hanging rails

Overview

Most solar mounting brackets may be used with them. Usually constructed from premium galvanized steel, these rails come in a range of lengths. They are made to handle heavy wind and snow loads. These products are designed to allow workers to quickly and effectively install solar panels that will last for decades on the roof, with minimal effect on the roofing materials. Solar Photovoltaic (PV) system as a source of renewable electricity. Solar electric power can be made available continuously for consistent on-off grid applications. Brackets support the solar panels by maintaining the proper angle position while they withstand wind force to secure your investment. Mounts safely secure a full array.
