

Can photovoltaic panels be installed on a ridged roof

Overview

The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material. Roof Assessment Determines Installation Feasibility: Solar panels add 3-4 pounds per square foot to roof structures, requiring thorough evaluation of structural integrity, especially for roofs over 10 years old. Replacing an old roof before installation saves \$2,000-\$5,000 compared to removing and. There are numerous advantages and benefits to installing your own set of solar panels on your roof rather than paying for professional installation. But how do you go about doing it?

Well, you're in the right place. That whole system—the panels, the racks, the wiring—has to be engineered to survive. If done with a meticulous and well-thought-out approach, it can be very beneficial.
