

Can photovoltaic panels cure house leaks

Overview

Installing solar panels changes roof dynamics by adding penetrations, altering water flow, and creating microclimates under arrays. Leaks can lead to structural damage, mold growth, and costly repairs, and they may void roofing or solar warranties if installation standards are not met. In the worst-case scenario, roof damage from solar panels can even lead to leaking within a home, which could cause further complications and safety concerns for the property and its inhabitants. Most modern solar panel arrays utilize racking systems that require holes drilled directly into the roof. In virtually all cases, the answer is no. ”

“The installer drilled through my shingles. Imagine investing in a brand new energy solution, only to discover a nightmare later: a poorly installed solar panel system that's left you with a roof leak to fix.

Can photovoltaic panels cure house leaks
