Access independent lithium prices for carbonate, hydroxide, and spodumene. Benchmark's IOSCO-assured data powers contracts, risk management, and investment decisions. Lithium remains a critical metal in our technology-driven world, powering everything from rechargeable batteries for electric vehicles and renewable-energy storage such as solar and wind, to electronics and industrial uses. Lithium carbonate prices in North Asia fell below US\$9,550 per metric ton in February — their weakest level since 2021. Lithium demand is surging, but volatility remains: The global push for EVs and renewable energy is driving lithium demand, but price swings and supply chain disruptions make the sector unpredictable. North America is racing to secure local supply: Governments in the U. and Canada are prioritizing. Canada's energy storage market is experiencing a surge in 2025, with lithium-ion batteries, including the increasingly popular LiFePO₄ (lithium iron phosphate) variant, at the heart of this transformation.
