

Colombia Communication Base Station Supercapacitor Regulations

Overview

The latest version of RETIE was established through Resolution 40117 on ApThis regulation supersedes previous versions, including the foundational Resolution 90708 of 2013 and its subsequent updates. In April 2024, the Ministry of Mines and Energy of Colombia (MME - Colombia) published updated. What is a Type Approval or Certificate of Conformity?

A government agency or designated body grants a Type Approval or Certificate of Conformity (or Conformance) to verify that a product entering the country has met minimum technical, safety, and regulatory requirements. In the case of electrical. · Miniature asymmetric supercapacitors have higher voltage and energy density but are often limited by a complex manufacturing process and difficulties in further miniaturization. The primary telecommunications law in Colombia is Law 1341 of 2009, which defines the main principles, concepts and legal guidance for providing telecommunication services in Colombia. Most satellite equipment and all cellular products (voice and data) and devices that connect to the PSTN (Public Switched Telephone Network) require CRC certification. Although Colombia does not.

Colombia Communication Base Station Supercapacitor Regulations

Market Approval for Colombia and the CRC certification
