

# Copenhagen rooftop solar power generation system

## Overview

---

The project will use building-integrated photovoltaics (BIPV) on pitched roofs and building-attached photovoltaics (BAPV) on flat roofs from Danish specialist Solartag. Construction has started on a neighborhood-scale energy collective in Denmark powered by BIPV and BAPV. CapMan unveils Scandinavia's largest rooftop solar project, transforming Glostrup's Stationsparken with 7,500 m<sup>2</sup> of solar panels, set to power a third of the building's energy needs! CapMan, a Nordic private assets manager, has announced plans to install a large rooftop solar system on the. Denmark's largest energy community is now under construction, featuring more than 30,000 sqm of solar rooftops with a total capacity of about 4 MW. The Stationsparken building Copenhagen. The network consists of 34 units of Sungrow's SG350HX string inverters and JinkoSolar Tiger Neo 72HI4- (V) solar modules. In an area spanning 100,000 square meters, the 14-megawatt array with 24,000 solar modules sits on the rooftop of a warehouse for DSV — a Danish transport company in Landskrona. Logicens is managing the largest roof top solar development program in the Nordics, and project by project we are overcoming new hurdles.
