

# Cost of 100kW Photovoltaic Container Used in Australian Ports

## Overview

---

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The figures below show the battery behaviour in summer and winter, to observe the impact of seasonal PV solar variation. Performance of a system with 120kWp of PV solar capacity in Summer, showing the small amount of grid energy needed to supplement the solar. At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing. How much does a 100kW Solar System cost in Australia?

A high-quality 100kW solar system in Australia typically starts from around A\$39,999, making it a cost-effective choice for medium to large businesses, schools, warehouses, shopping centres, or community facilities. Between now and the end of the year, container shipping prices will likely remain soft particularly if the current ceasefire between Israel and Palestine enables more.
