

# Development information of photovoltaic energy storage products

## Overview

---

Novel solar photovoltaic materials could change renewable energy. Researchers and engineers have developed materials with enhanced efficiency, cost, and durability through continual study and technical breakthroughs. These advances have made solar photovoltaic technology a more viable option for renewable energy generation. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. Coupling solar energy and storage technologies is one such case.
