

Djibouti city clean electricity

Overview

Djibouti has unveiled one of its most ambitious energy programmes yet — a nationwide solar-storage grid designed to eliminate chronic power cuts, reduce electricity import dependency, and position the country as an East African clean-energy hub by 2030. Situated in the Horn of Africa, Djibouti currently relies heavily on energy imports to meet domestic demand. The initiative, announced by Energy Minister. •Develop a sufficient, clean and robust electricity supply to support the economic objectives of Vision 2035, to make Djibouti an emerging country. Strengthening and ensuring energy independence in terms of electricity supply Reducing fuel poverty among the population 100% energy green Integrate. International Day of Clean Energy, celebrated on 26 January, highlights the crucial role of climate-friendly energy in building a sustainable future. Under the leadership of Yonis Ali Guedi, minister of energy since 2017, the country is increasing its solar and wind power projects.
