

Djibouti increased renewable energy penetration

Overview

In September 2023, Djibouti inaugurated its first wind farm in the north of the country. Add solar farms, geothermal power and biomass plants, and Djibouti hopes to become the first country on the continent to supply its population with 100% renewable energy. The development of renewable energy in Djibouti has become a national priority as the country aims to achieve 100% energy generation from renewable sources. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. This. •Develop a sufficient, clean and robust electricity supply to support the economic objectives of Vision 2035, to make Djibouti an emerging country. Strengthening and ensuring energy independence in terms of electricity supply Reducing fuel poverty among the population 100% energy green Integrate. A comprehensive look at the ecosystem, growth drivers, and investment potential for renewable energy within the Djibouti market.

Djibouti increased renewable energy penetration
