

Do all new houses have photovoltaic panels

Overview

Yes, most new single-family homes and low-rise multifamily buildings must include a solar PV system per the 2025 Title 24 energy code. Are there any exemptions to the solar mandate?

Some homes may be exempt if they have limited roof space or are enrolled in approved community solar. The 2025 update to California's solar mandate requires most new residential construction to include a solar photovoltaic (PV) system. The law builds on the original 2020 solar requirement and now emphasizes. Solar panels offer a variety of financial and reliability benefits to homeowners and can increase the sale prices of homes. Integrating solar photovoltaics (PV) into new construction is becoming more and more popular in the United States. In California, rooftop solar PV became a requirement on. With over 12 years in the solar industry, GreenLancer helps contractors meet California solar mandate requirements with fast, code-compliant plan sets, engineering, and PE stamps for any solar panel installation in California. A second mandate was also voted into law, requiring new commercial buildings.

Do all new houses have photovoltaic panels
