

Does photovoltaic panel installation require an electrician

Overview

While DIY solar installation is possible, certain tasks legally require certified professionals. Installing a grid-tied solar system requires both a construction permit for the physical structure and an electrical permit for the wiring and connection, which varies. However, any electrical connections to the power grid must typically be completed by a licensed electrician. This. Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid. Installers also must travel to jobsites. Although installers typically need a high school diploma, some take courses at a technical school or. States and localities establish licensing requirements for contractors and electricians in order to protect consumers from unsafe practices and protect the reputation of the industry, as improper installation may create safety risks or result in poor equipment performance.

Does photovoltaic panel installation require an electrician
