

# E scooter battery storage

## Overview

---

Keep your battery at 50–70% (recommended range) if you won't ride for weeks. Never store it fully drained—it may not recover. Keeping your scooter in the right place not only protects it from damage but also keeps it ready to zoom when you are! The best spot?

Inside your home, away from rain, snow, and extreme temperatures. Understanding the nuances of e-scooter storage isn't just about finding a convenient spot to park – it's about preserving the intricate balance of electronics, mechanics, and battery chemistry that keeps these modern marvels running. Whether you're dealing with scorching summer heat, freezing. If you are storing your electric scooter for the Winter, the essential thing you should take care of is the scooter's battery. To preserve your electric scooter's battery health, it's advisable to maintain a charge level of around 60% and recharge it at least once a month. Consider removing and storing.
