

Electric tricycle solar panels

Overview

The short answer is yes, you can add a solar panel to an electric tricycle. However, there are a few things you need to consider before you go ahead and make the modification. The motor is at the pedals, and gently increases your power as you pedal. With 2x200watt solar panels, you could pedal all day in the sunlight without plugging and you can travel as far as possible. Commuting, traveling, exercising. While the world is shifting towards clean transport quickly, solar-electric trikes are proving to be a new, green option for short-distance transport.
