

Electricity rates morocco

Overview

The residential electricity price in Morocco is MAD 1. These retail prices were collected in June 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Morocco. Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water. Electricity production tends to closely match demand, which in turn. Except where otherwise noted, content on this site is licensed under a Creative Commons Attribution 4. Official and up-to-date data of Morocco for all years of statistics, in an easy-to-read format. Currently, the country imports approximately 90 percent of its energy needs. Total primary energy consumption has increased by about five percent per year since 2004, but Morocco plans to decrease energy consumption by 15 percent.
