

Environmental sustainability budapest

Overview

In the heart of Hungary, Budapest is embarking on an ambitious journey towards a greener, more sustainable future. As part of the European Union's "100 Climate Neutral and Smart Cities" initiative, the Hungarian capital has committed to achieving climate neutrality by 2030. The strategic document aims to reduce carbon emissions by 80% and. From shopping at zero-waste shops to discovering the city by bike, there are numerous ways to keep your carbon footprint low in Budapest. The city is also among those urban destinations that take part in annual international movements such as Earth Hour and Earth Day, two increasingly important.
