### Designing to Protect 5G Macro Base Stations for High Reliability

Attaining high reliability often requires that the 5G macro base stations be robust to powerline surges and electrical disturbances such as lightning-induced transients and other ...

---

### Designing to Protect 5G Macro Base Stations for High Reliability

Downtime is unacceptable in any communication system, and that certainly includes the new 5G cellphone communication systems. Attaining high reliability often requires that the 5G macro ...

### 5G Base Station Power Upgrade: Custom Rectifier Module ...

Upgrade 5G base station power in outdoor, indoor, and shared cabinets with custom rectifier module solutions for efficient, scalable, and reliable performance.

## Designing to Protect 5G Macro Base Stations for High Reliability

Protecting The Baseband Unit  
Protecting The Power Supply and Backup Battery System  
Designing Base Stations For Maximum Uptime  
All in all, communication infrastructure must have extremely high reliability so that uptime can exceed 99.9%. The recommended component technologies could help provide the high reliability needed for wireless communication infrastructure by protecting the circuitry from the five sources of electrical hazards. There is a wide range of safety compon See more on [allaboutcircuits.enersys.cn](#)
