

Free photovoltaic panels installed in rural houses

**SUPPORT REAL-TIME ONLINE
MONITORING OF SYSTEM STATUS**

Overview

Currently, there are no federal or state government programs that provide free solar panels to low-income solar customers, but there are programs in place to greatly reduce the upfront cost. The ITC — also known as the Federal Solar Tax Credit — is a popular tax rebate program offered by the US Federal. GRID Alternatives' Energy for All program makes solar power accessible to families who need the savings most, while providing hands-on solar installation experience to volunteers and job trainees. We provide low-to-no cost solar electric systems to families that qualify as low income, and install. There are solar panel grants for homeowners in underserved areas that can make your dream of clean energy a reality without draining your savings.
