

Government procurement of fast charging cabinet for hospital energy storage

Overview

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase Agreements (PPAs), and term sheets. Provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development. It also includes contracting strategies for OBO projects. The following provides information on California energy storage legislation, the CPUC energy storage program and projects evaluation, CPUC energy storage proceedings, current energy storage procurement, and previous activities. In 2010, the California Legislature authorized the CPUC to evaluate and.
