

# Guinea demand response

## Overview

---

The Guinea Economic Update presents an overview of Guinea's evolving macroeconomic position, recent economic developments, macroeconomic outlook, and risks. Guinea's GDP growth accelerated to 5.7 % in 2024, driven by both the mining and non-mining sectors, and is anticipated to reach low double digits in the medium term, fueled by the commencement of Simandou iron ore operations. The emergence of Simandou iron ore exports, expected by 2026, will boost. Learn about the market conditions, opportunities, regulations, and business conditions in Guinea, prepared by U.S. Embassies worldwide by Commerce Department, State Department and other U.S. agencies' professionals. Guinea has had a long history of political repression, with more recent episodes. Guinea bauxite exports have surged in 2025, driven by record shipments to China and reinforcing Guinea's dominance in the global bauxite market. 7% in 2023, up from 4% in 2022. Prepared by Aristide Medenou, Miguel Eduardo Otero Nule (all AFR), Azar Sultanov, Martin Stuermer (all RES), Alejandro Badel, Yunhui Zhao (all SPR), Ha Nguyen, Tolga Tiryaki (all ICD), Judicael Guihy (MCM), Jean-Charles Normand, Oumar Dissou (all AFW), and Melody Manning provided editorial support. Aluminium, a highly versatile and low-density material, is used in sectors such as automotive, aerospace, construction, packaging and consumer products.
