How To Heat Your Home With Solar Heating

Solar Heating
How The System Works
Air Handling Unit
Adding A Thermal Mass
That's where active solar comes in. Active solar heating works under the same basic principle as passive solar. However, that's about the end of their similarity. The major difference between the two is that an active solar system has an "active" element, which moves the heat from the collector and absorber to the thermal mass or directly into the See more on [offthegridnews](#) Images of Heating Solar Panels
