

High-Temperature Resistant Folding Containers for Resorts

Overview

High temperature plastic containers are specially designed to endure extreme heat conditions that exceed the capabilities of standard plastic containers. These containers are made from robust materials such as polyphenylene sulfide (PPS), polyimide, and other high-performance. Extreme-temperature process totes and lids withstand large fluctuations and differentials in temperature. These polypropylene totes are chemically resistant to acids, alkalis, oils, and detergents. The tough, smooth surface won't chip and is mildew-proof.

High-Temperature Resistant Folding Containers for Resorts

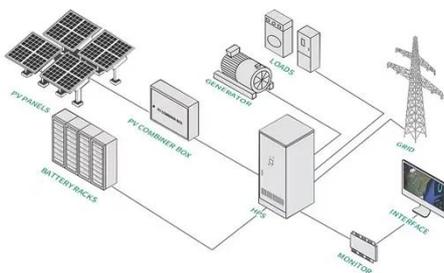

High Temperature Pouches

IMPAK produces quality pouches for high temperature applications such as hot fill, retort, and EV battery cooling.

Extreme-Temperature Process Totes & Lids

Extreme-temperature process totes and lids withstand large fluctuations and differentials in temperature. They store and cover hot items during transport from a production line.

freetown folding container
