

Homemade generator blades

Overview

Click here to read about how to build a Homemade Wind Turbine Generator Rotor & Blade Assembly using PVC Pipe: <https://www.com/id/PVC-pipe-blades-and-rotor-for-HAWT-from-scrap/>. Creating a DIY wind generator needs a few key parts: the generator, blades, and tower. Choosing the right materials and designing well can help you make a lot of electricity. Learn how to design and build wooden blades for your wind. This Instructable will give you a step by step process on how to carve a real wind turbine blade out of wood (not those fake ones from a 4" PVC pipe, but they are cool too. This was designed by me, a real Aerospace Engineer, using real airfoils, and optimized for a small wind turbine at lower. saw (+jigsaw+bandsaw.) Keep your tools very sharp, and always work with the grain of the wood, to prevent it splintering. Grip the workpiece firmly to a bench with a G clamp. You just need to understand how best to harness it.
