

Hospitals install solar and energy storage

Overview

Combining renewable energy with electricity storage can help hospitals remain operational during extreme weather or other disruptions to the electric grid. NEW YORK - New York City Department of Citywide Administrative Services (DCAS) Commissioner Dawn M. Pinnock and NYC Health + Hospitals President and Chief Executive Officer Mitchell Katz, MD, today announced the completion of the first-ever solar panel installation at NYC Health + Hospitals. The. Over two hundred solar panels installed at the Brooklyn long-term care facility will offset more than 11% of the facility's annual electric grid use and advance the public health care system's clean energy goals NYC Health + Hospitals/McKinney CEO Daveth Forbes-Thomas (center) with NYC Health +. The 55-kW installation could provide electricity during power outages in addition to cutting emissions and offsetting energy costs, the city provider says. Add us as a Google Preferred Source to see more of our articles in your search results. The 55-kW solar panel installation atop NYC Health +. For clinics that face heat waves, unstable power grids, or natural disasters, the ability to maintain power can be the difference between being able to help patients and having to shut down. As a disaster responder in places like Haiti and Puerto Rico during the aftermath of earthquakes and. Because they use so much energy, hospitals are in a position to realize better than average energy savings—and energy cost savings—through the use of renewable energies.
