

How long can the supermarket lockers last

Overview

On average, metal lockers last 10–15 years. However, factors such as rust and dents can shorten their lifespan, especially in environments that are not dry and temperature controlled. It's important to note that we cannot say for sure how long your lockers will last or identify exactly what maintenance will be required. That's what has always made providing lifecycle cost estimates hard to project. Perhaps Product A is 30 percent cheaper than Product B but it's also a lower. Metal lockers have been the standard for a long time due to their durability, but they've received some criticism over the years because of the constant upkeep and maintenance that they require. However, the actual lifespan of a steel locker can. Good maintenance keeps lockers working well, looking sharp, and lasting longer. Customers place orders online or via mobile apps, then retrieve their groceries from these lockers at their convenience.
