

# How much can a 4-meter locker hold

## Overview

---

It's difficult to give an exact number as it depends on the size of the boxes and how they are stacked, but a 4x4 storage unit can typically fit anywhere from 5-10 medium-sized boxes. Remember that you may also utilize vertical space by using shelves or stacking boxes on top of each. Sizes include storage lockers, and sizes ranging between 5' x 5' and 5' x 10'. Our medium storage units are perfect for customers who need flexibility during key life events.

Step One: Make a quick list of items you plan to store, including furniture, appliances, and any awkwardly-shaped items that will not be packed in boxes.

Step Two: Estimate how many boxes you will place in your storage unit. Just be sure to check the measurements of any objects before you. About the size of a walk-in closet, 5'x10' units can hold 15 packed boxes, or slightly fewer boxes if packed alongside larger pieces of furniture.
