

# How much discount is the new solar panel suitable for home use

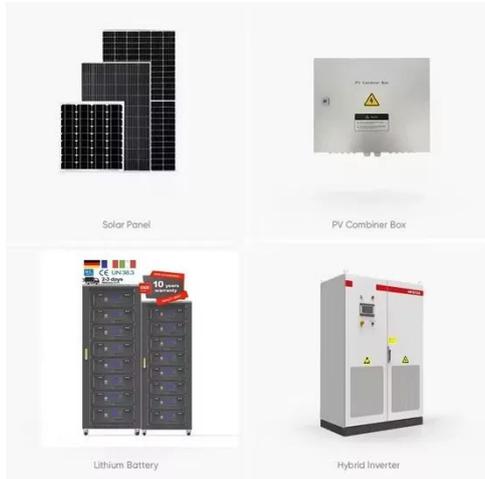

## Overview

---

Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Strong Long-term Returns: Despite upfront costs, solar systems typically save \$20,000-\$60,000 over 25 years while increasing home values by approximately \$15,000, making them one of the most reliable home improvement investments available. Anything you can do to lower the cost goes a long way to making it easier to take the leap and start paying your utility company less money each month. Cutting corners can help you save money, but you don't want to. Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live.
