

# How much does it cost to invest in energy storage solar in the UK

## Overview

---

In the UK, the cost of solar batteries depends on factors such as storage capacity, brand, and installation fees. As of 2025, the cost of installing a domestic battery system in the UK typically ranges from £3,000 to £10,000, with the actual cost varying by brand, installer. But with battery prices varying from £4,000 for an entry-level 4kWh right up to a whopping £12,000 for a 16kWh model, choosing the right system for your home is vital. Adding a battery to your solar PV system can help you store excess solar power, reduce grid reliance, and use more of the electricity your panels generate — even. The retail cost of home solar batteries typically ranges from £1,200 to £5,000. However, a more precise way to assess their value is by using the £/kWh metric, which stands for price per kilowatt-hour of storage. This pricing can vary between £265 and £415 per kWh. The more affordable options often.
