Why We Recommend It: This model outperforms competitors with its peak capacity of 15,000W, thanks to its upgraded toroidal transformer. It offers both 110V and 220V outputs, accommodating diverse applications, and supports multiple battery chemistries including lithium and lead-acid. Its. The 5kW inverter power system is used to convert DC power from batteries into AC power, so that it can be used for running of household appliance, tools and electromagnetism in off grid field or mobile field. 5KW inverter are used by people who consume moderate to high-energy in off-grid. This means that the inverter can handle a maximum load of 5,000 watts or 5 kilowatts. Innovatively combining an MPPT solar charge controller, a Growatt 5000-US multifunctional off-grid solar inverter, integrated with a MPPT solar charge controller, a high-frequency pure sine wave inverter, and a UPS function module all in one machine. Perfect for off-grid backup power and self-consumption applications.
