

How much is the power of the solar container outdoor power in East Timor

Overview

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country's first full-scale renewable energy IPP. Based on the cost of investments benefiting grid-connected households (average \$640 per connection plus subsidized tariff), a substantial upfront cost subsidy for a modest-sized solar home system (for example, 50 watt-peak) may be justified in Timor-Leste on equity grounds. In East Timor, the outdoor power supply is a portable energy storage power supply with a built-in lithium-ion battery and its own energy storage. 5] MW/1 hour battery energy storage system ("BESS"), a substation ("Substation") (together, the "Facility"), Balance of Plant, integrated communications and control systems and.
