

# How much power does a portable power bank have for camping

Solar

## Overview

---

For a 3-day camping trip, a power bank with at least 20,000mAh is recommended. This capacity can charge a smartphone 4-5 times and support small devices like headlamps or cameras. If you plan to charge multiple devices, consider a 26,800mAh power bank for more reliable and. The power bank size you need for camping depends on several factors, including the devices you plan to charge, the length of your trip, and how often you'll use those devices. This article will help you determine your specific camping power needs and choose the right power bank capacity for. From keeping your phone charged and lights on to powering coolers, laptops, drones, and even a blender, portable power stations are now the go-to choice for reliable, silent power at the campsite. even though many gas generators are super quiet. Whether it's snapping a picture of the local flora and fauna, setting an alarm for your sunrise hike, or pulling up directions for the drive home, it's essential that you have enough juice to last. I've tested multiple portable power banks in remote locations, and the top performers include the Jackery Explorer 1000 v2 with 1070Wh capacity for high-demand devices, the GRECELL 300W station offering 230.
