

How much tax is charged on the sale of photovoltaic panels

Overview

When solar panels are sold, the revenue generated from the sale is typically subject to capital gains tax. The profit realized is calculated by subtracting the original purchase price (cost basis) from the final selling price. Fortunately, many states have passed sales tax or property tax exemptions for residential solar panels. Selling solar energy typically incurs several tax obligations that vary by location, energy production, and applicable tax incentives. Federal tax incentives may provide advantages, potentially.

How much tax is charged on the sale of photovoltaic panels

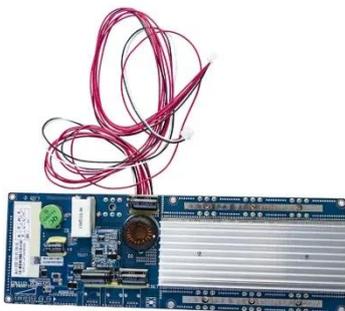

Tax exemptions for home solar power

Solar sales tax exemptions reduce the upfront cost of going solar. If you live in a state with sales tax, you could pay between 2.9% and 9.5% sales tax on the cost of a solar installation. 17 states exempt that ...
