

How to clean up a large number of photovoltaic panels

Overview

Spray the panels with a hose to remove loose dirt and debris. Turn off the solar. Dust, dirt, pollen, bird droppings, and other debris can reduce energy output by 15-25%, according to the National Renewable Energy Laboratory. How often is cleaning solar panels necessary?

For residential systems, a visual inspection is recommended every 6 months and a washing of the solar panels at least once a year. In particularly dusty areas or near the sea, washing solar panels should be more frequent. Presence of trees or foliage: While going solar is pretty much a "set it and forget it" way to power your home with renewable energy, depending on where you live, you'll still need to clean your solar panels once or twice a year to ensure you get the maximum energy benefit from your solar investment.
