

# How to deal with the theft of rural photovoltaic panels

## Overview

---

To prevent solar panel theft, assess remote installation risks, strengthen physical security, install alarm systems, use surveillance cameras, and establish community watch programs. That is a very important process when seeking to protect solar panels in far points. There are currently just a little over 1000 solar farms in operation, which provide clean energy to the grid, many of which are owned by farmers themselves, making use of their outdoor space. Unfortunately, what should be a virtuous initiative is giving rise to a new crime wave, with police data. Solar panels represent a valuable investment and like any such investment, care must be taken to protect them from theft. This article looks at six ways how. Solar panel theft has increased by 87% on agricultural properties in the last three years, with the average farm losing \$25,000-40,000 per incident.
