

# How to decouple the batteries in the battery cabinet

## Overview

---

The right tool is usually a 10mm wrench —but check your battery terminals, as some may vary. Always loosen the negative terminal first (marked with a minus sign or black cable). Once loose, lift the clamp off and move it aside so it doesn't touch anything. Lockout/Tagout the battery breaker in the OFF (open) position. Disconnect and remove the DC cables, N.
