

# How to drill holes for photovoltaic sheet pile machines

## Overview

---

A rotating auger drills into the ground, removing soil and creating a cylindrical hole. A down-the-hole hammer is attached to the drill string and strikes the bottom of the hole. Watch our powerful photovoltaic pile driver in action! ☞☞☞ This hydraulic solar pile driver is specially designed for ground-mounted solar panel installation. Hardrock solar pile driver can drive the pile into soil or rock to support the solar panel for solar power station system and guardrail installation, the common application is for Photovoltaic panels installation. There are several types of Photovoltaic rigs, from manual rig, to semi-hydraulic pile driver. Piles can be drilled effectively with augers. It is widely used in solar farm installations, foundation work, and other projects where strong and deep piling is needed. A heavy weight (hammer) is raised.
