

# How to install the bird-proof rope for photovoltaic panels

## Overview

---

(1) Cut the PVC-coated mesh to an appropriate size for your solar panel (2) Use a piece of plywood to bend the mesh at a 45-degree angle so that it sits on the roof (3) Attach a clip to the solar panel (4) Place clips every 18 inches (5) Thread the clips through the mesh. (1) Cut the PVC-coated mesh to an appropriate size for your solar panel (2) Use a piece of plywood to bend the mesh at a 45-degree angle so that it sits on the roof (3) Attach a clip to the solar panel (4) Place clips every 18 inches (5) Thread the clips through the mesh. In this video, I'm installing bird mesh around solar panels to stop pigeons from nesting underneath—a common problem for homeowners with rooftop solar setups. I'm testing: ☐☐ Two different types of bird mesh ☐☐ Three different types of clips My goal is to find out which combination works best for. In this guide, we'll walk you through the steps needed to install bird proofing mesh on your solar panels. Birds can cause significant damage to solar panels by building nests underneath them. Here are the best choices, explained in simple steps: Strong metal mesh stops birds from nesting under panels. Reflective tape, fake owls, or shiny objects. How birds cause and photos of example we've caught to show you & then products we'd use to fix each one.
