The panels provide flat, warm, and safe spots. Panels protect birds from wind and rain. And being higher gives birds a better view of the area, which keeps them safe from predators. You may not always see birds on your solar panels, but there are clear signs. In this video, I'm installing bird mesh around solar panels to stop pigeons from nesting underneath—a common problem for homeowners with rooftop solar setups. Do birds have diseases and can they give a disease to me?
