

# Huawei Flow Battery Car

## Overview

---

Huawei has developed solid-state battery tech that could make EVs go further and charge faster. Chinese patent application says the new battery pack could be fully recharged. Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes. The project appears in a 2023 patent filing, suggesting it has been in development for at least two years. Solid-state batteries are seen as a possible step forward for energy storage. Huawei's sleek Aito EV turns heads at the auto show, blending smart tech and luxury design in a bold statement about the future of electric mobility.

## Huawei Flow Battery Car

---

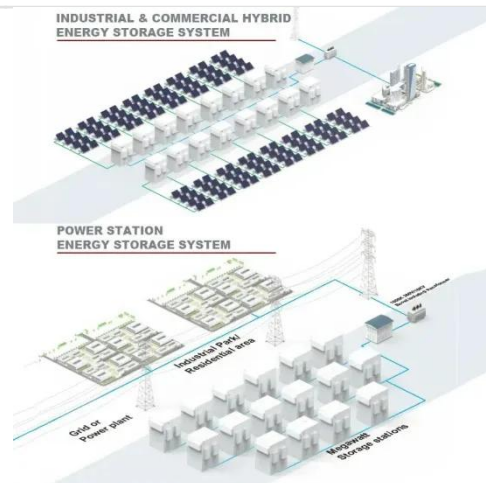

### Huawei is working on EV battery that will last for 1,800 miles on just

Huawei is developing a solid-state EV battery that could deliver 1,800 miles on a 5-minute charge, reshaping electric vehicle performance

### Huawei makes bold claim with 3,000 km-range electric car battery

Now it seems Huawei wants to make a next great leap forward with solid-state batteries - described as a 'holy grail' for the electric vehicle sector - by filing a patent for a battery that

### Huawei unveils EV battery tech with 3,000 km range, 5 minute

Huawei has joined the debate about future-generation electric cars with a pretty radical suggestion: a battery system that might charge an EV for more than 3,000 kilometres.

## Huawei's 3,000km solid-state battery patent with 5-minute charge

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast ...

## Huawei patents EV battery offering 3,000 km range and ultra-fast five

Huawei has filed a patent for a sulfide-based solid-state battery that promises up to 3,000 kilometers of range and 10% to 80% charging in under five minutes. - VnExpress International.

## Huawei Patents EV Battery Offering 3,000 km Range

Chinese tech giant Huawei has filed a patent for a next-generation solid-state electric vehicle (EV) battery that claims to offer an unprecedented driving range of over 3,000 kilometres on a ...

## Huawei says its new solid-state EV battery can give you

Huawei is the latest in a growing list of

automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW,

---

## Huawei's 3,000km, 5-minute charge battery patent just supercharged ...

Just recently, Xiaomi filed its own patent for a composite electrode that improves ion flow -- showing how critical battery know-how has become, not just for cars, but for everything mobile.

---

## Huawei patents EV battery capable of 3,000 Km on a single charge

Huawei claims to have developed a pioneering solid-state EV battery capable of delivering a driving range of over 3,000 km on a single charge. Remarkably, this battery can reportedly be fully ...

---

## Breakthrough EV Battery Patent Could Charge In

## Minutes And

Huawei has developed solid-state battery tech that could make EVs go further and charge faster. Cells have triple the energy-density of li-ion ones and could theoretically give an 1,800 ...
