

# Is it cost-effective to install photovoltaic panels

## Overview

---

Installing solar panels costs \$2.50 per watt and can increase your home's value, making it more appealing to future buyers. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. While the upfront costs of solar panels have dropped by over 70% in the past decade, a comprehensive lifecycle analysis includes several key components: initial purchase and installation (\$15,000-\$25,000 for an average home system), ongoing maintenance (roughly \$300-500 annually), inverter. In 2025, solar panels are more accessible and cost-effective than ever before, thanks to advancements in technology and widespread adoption of this alternative energy resource. This article was created using automation technology.
