

# Is it normal to hear roosters crowing under photovoltaic panels

## Overview

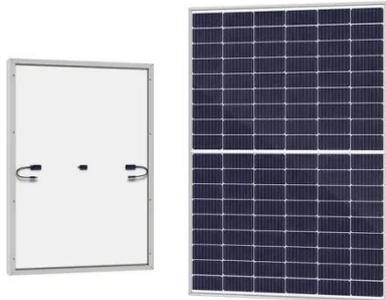

---

Have you ever heard strange scratching noises coming from your roof?

You can't ignore it—scraping sounds day and night. This could indicate that birds have built a nest under your solar panels. Birds bring twigs, leaves, and other nesting materials with them, creating scraping and scratching noises. The gap between your roof and solar panels creates a warm, shaded haven that's highly attractive to small animals. Squirrels, pigeons, and rodents often see this space as prime real estate for nesting. Droppings block sunlight and lower energy output.

## Is it normal to hear roosters crowing under photovoltaic panels
