

Is there no solar power generation in the south-facing garden

Overview

Is solar power still a feasible option?

The answer is a resounding yes. Let's delve into the intricacies of solar panel orientation and how you can harness the sun's energy regardless of your home's direction. The common misconception is that solar panels. Plenty of homes skip solar because their roofs do not face south or full sun all day. However, a south-facing roof is by no means a necessity for a productive and economically viable solar power system. [r/DIYUK](#) is for UK specific DIY help, questions and projects.
