

# Kenya Energy Storage System

## Overview

---

The Kenya Electricity Generating Company PLC (KenGen), has been designated to be the Implementing Agency for the Kenyan Battery Energy Storage System (BESS), which is part of the Kenya Green and Resilient Expansion of Energy (GREEN) program, funded by the World Bank. Kenya currently has approximately 210 MW of grid-connected solar, accounting for 6. The new system marks a significant step in Kenya's transition to a low-carbon future and reinforces KenGen's commitment to reliable. NAIROBI, Kenya, Feb 3 - Kenya has renewed its call for faster deployment of solar energy and battery storage as Intersolar Africa 2026 officially opened at the Sarit Expo Centre in Nairobi, bringing together policymakers, investors and clean energy players from across Africa and beyond. In a speech read on his behalf during the opening of the Intersolar Africa 2026 conference in. Kenya is no stranger to innovation in energy. With the geothermal-rich Rift Valley, world-class wind corridors in Marsabit and a solar belt that stretches across vast regions, the nation has made bold strides in renewable energy. The sector is now asking, will BESS be part of the solution?
