

Load shifting botswana

Overview

The Botswana Power Corporation (BPC) has brought back nationwide load shedding, blaming the move on declining baseload production at the Morupule B Power Station and weakened solar power generation due to ongoing cloud cover. We also bemoaned the fact that the government has been mute on the matter. In a statement issued on Monday, BPC said a forced curtailment of supply at Morupule B Power Station has significantly reduced. Botswana on edge as ZESCO power crisis threatens prolonged blackouts The urgency is clear, unless immediate action is taken, Botswana could be on the brink of a serious electricity crisis with widespread social and economic consequences BONGANI MALUNGA Botswana's electricity supply is under serious. Botswana Power Corporation (BPC) is intending to reintroduce load shedding as it deals with ongoing electricity generation challenges from its main power plant, Morupule B. The power utility says effective Septem, the measures will primarily affect peak hours from 6:00 AM to 10:00 AM. The Botswana Democratic Party (BDP), still reeling from its historic defeat in the October 2024 general elections, has criticized the Botswana Power Corporation's (BPC) planned load-shedding measures, describing them as “bad economics.
