

# Long-term product warranty for outdoor telecom cabinets

## Overview

---

Choosing the right IP protection class ensures long-term reliability, reduced failures, and minimal maintenance costs. When it comes to outdoor telecom cabinets, your IP (Ingress Protection) rating isn't just a badge—it's a survival guarantee. Available in NEMA 4X configurations, the WOD-78DDXC ensures reliable performance in extreme conditions, including heat, cold, wind, rain, and ice. AlumiFlex® Construction: When your network infrastructure demands reliable outdoor protection, American Products delivers weatherproof telecom enclosures engineered for performance and built to last. Bad choices can cause equipment to break, cost money to fix, and stop work often. Additionally, it has a robust locking system and a one-year warranty for any application, including FFTH and network integration systems. Telecommunications companies rely on custom and standard NEMA-rated electrical boxes to protect their sensitive equipment.
