

Microgrid Reporting Meeting

Overview

This group brings together all five FERC commissioners and ten state regulators to share views on power-sector rules. They will focus on electric reliability and resource adequacy under RTO governance. There are no impediments from the State of NH for building a microgrid. Examples: Sensitive end users such as hospitals, schools, military bases, and airports. Energy Division hosted a series of workshop between May 2022 and November 2023 exploring the more complex aspects of equitable resiliency evaluation and planning through practical applications. Read the. Microgrids serve as an effective platform for integrating distributed energy resources (DERs) and achieving optimal performance in reduced costs and emissions while bolstering the resilience of the nation's electricity system. The value of microgrids is further enhanced with issuance of FERC Order. On Sunday, July 27, FERC will hold its third public meeting of the Federal-State Current Issues Collaborative.

Microgrid Controller Survey Report: 2024 Update

The results of the survey are presented in this report with the current status of commercial microgrid controllers analyzed, potential research gaps identified, and future research trends revealed.

Next Week's Energy Meetings and Reports

This July report will show that solar generation hits 124 billion kWh--up 34% from last year--and outpaces hydropower by 50%. Readers can download tables and graphs from the ...

Microgrid and Integrated Systems Program - Department of Energy

While DOE has made significant progress in supporting microgrid deployments, there remain research gaps for both remote microgrid, and microgrids for critical infrastructure, which are being addressed ...

Microgrids 101

Presentation was intended to build foundational understanding of energy resilience, reliability, and microgrids.

The image shows two white microgrid control cabinets standing side-by-side. Each cabinet has a digital display on top and several drawers or compartments below. The cabinets are positioned on a light-colored surface against a plain background.
